

DELTA

Case Packing System

Our systems offer high performance in terms of speed, accuracy, repeatability and flexibility with highly precise movements and positioning.

Constructed in stainless steel for durability, strength and longevity. Reliable, trouble-free maintenance and low-cost servicing. User friendly controls. Designed and built by the Agrimech Engineering team.

Suitable for a wide range of products including potatoes, carrots, onions and citrus fruit.

Key Features

User friendly controls
Suitable for plastic trays, cardboard boxes, and cartons
Capacity dependant on pack count
Standardised Component parts including electric motors
Inverter technology
Gentle handling of product
Machine orientation to suit individual requirements
Quiet operation
Constructed in stainless steel

MAGMA

Our software brings your machine to life. Developed in-house, Magma is designed to give you the latest innovations in machinery automation.

Link your machine to the outside world and let us download, check, diagnose and amend software on your Agrimech machinery.
